Roving Meet & Greet Socials

Tuesday, April 22nd

Coming to Northeast Minneapolis!

The Executive Committee of the Twin Cities IEEE Section would like to meet our members, and provide a networking opportunity for our members to meet other members and potential members. However, we realize it can be difficult to come across town at rush hour. So ... we're coming to you! We are going to be hosting a number of Meet & Greet Socials around the Twin Cities, so it can be an easy stop after work. It's a great opportunity to network with IEEE members in your area! Bring along your friends and fellow employees!

Our next social will be **Tuesday, April 22nd at the Dangerous Man Brewing Co. in Northeast Minneapolis from 4 – 7 PM**. Appetizers and first beverage is on us! Click [HERE](#) for more information and to RSVP.

We Want You!!

Are you looking for a way to network with other engineers in the Twin Cities? Do you like organizing and attending technical and fun social events? Do you like spreading the word electronically or in-person?

Our Twin Cities Section of IEEE is looking for volunteers like you! We are looking for members to help plan Section activities and get the word out so that the Section continues to be of value to its membership.

How can you help? Opportunities include, but not limited to:

PACE (Professional Activities Committees for Engineers) – PACE promotes the professional interests of IEEE members as well as allows members to address professional needs. Activities include:

- Non-technical seminars, tutorials, etc. to further member professional development.
- Fun social events for members to meet and network, such as Roving Socials, E-Week/Awards Banquet, and IEEE Day activities.

Communications – Timely communications to the membership is a continual challenge. We welcome help pushing Section news and events out in the various and numerous communication channels, such as Section website, email, LinkedIn, Facebook, Twitter, etc.

Corporate Ambassadors – be the “Go To Person” at your work for our IEEE Section. Promote Section and Chapter events to help raise awareness of our various Chapters and Committees.

Click [HERE](#) to send a note to tc-news@ieee.org to express your interest!

Chair's Corner

It's been another great first quarter in the Twin Cities Section – Officer Training, and Banquet are now behind us, but that doesn't mean there is nothing else going on!

- We look forward to some down time and socializing at the next Roving Social, this time in Northeast Minneapolis on April 22nd. Click [HERE](#) to let us know you're going to join us.

- While you're there you can help us welcome Brian Bock – our new Vice Chair for 2014. Brian works at Seagate.

- Want to get more involved – just curious to see what's going on? Join us at our monthly ExCom meetings! We meet on the 1st Tuesday of the month at the Broadway Ridge building in North Minneapolis. Click [HERE](#) to get more information on meeting location and optional Webex access. Our next meeting is May 6th from 5-7, with food & networking beforehand.

Thanks again -- Andrew McCain, Twin Cities Section Chair tc-chair@ieee.org

PMI

The Project Management Institute is hosting a Professional Development Day for 600 people on Thursday September 24th in the St. Paul RiverCentre. The IEEE Twin Cities Section is partnering with PMI to provide several one hour presentations in the afternoon. The presentations can have technical content, however should connect the content with one of these topics: Strategic Planning, Managing your Portfolio, Agile Methodologies, Case Studies, Best Practices, Keys to Project Success, Project Management Tools, Soft Skills related to Leadership, Risk Management, Conflict Resolution, Metrics and Dashboards, Sustainability and MS Project.

Are you interested in presenting? Contact Curt McNamara at curtmcn@gmail.com for more details.

Meetings and Workshops:

Acoustic Communications Seminar

Signal Processing & Communications Chapter

April 22nd at Shevlin Hall, U of M

Click [HERE](#) for more information

Flowmeter Temperature Compensation

Instrumentation & Measurement Chapter

April 24th at Emerson Process Management

Click [HERE](#) for more information

Phoenix Project Study Group meeting

April 27th

Click [HERE](#) for more information

Best Practices, Benefits, and Economics of Load Testing

Power & Energy Chapter

May 8th at Sebesta
